

Figure 10. Trend in the Concentration of PCB in Lake Ontario Lake Trout

Temporal profile of total PCB concentration in Lake Ontario adult lake trout. Solid line is LOTOX2 simulation of lakewide average PCB concentrations in lake trout with revised estimates of historical PCB loadings. Average PCB concentrations measured in lake trout are shown for comparison with LOTOX simulation. This “base” forecast assumes no PCB load reduction after 1995. (from DePinto et al 2000)
